

## ***COLORADO Commentary***

### **Onion Crop Growth Stage and Status** Last Modified: 06/05/13

Warm, dry conditions persist but storms are forecasted for June throughout eastern and southern Colorado. The seeded and transplanted crops are beginning to catch up due to warmer conditions during late May.

### **Weather Impacts (temperature, rain, hail, freezing)** Last Modified: 06/05/13

No reports of any storm damage occurring in onion regions.

Temperature Outlook\* [2 – 4 weeks]: Above Normal

Precipitation Outlook\* [2 – 4 weeks]: Below Normal
