

## *Idaho Commentary*

### **Onion Crop Growth Stage and Status** Last Modified: 06/05/13

Onion crop development is normal, mostly 5 to 6 leaf stage. Low levels of thrips infestation. No significant disease or pest problems. A few fields show herbicide-related damage.

### **Weather Impacts (temperature, rain, hail, freezing)** Last Modified: 06/05/13

Weather conditions are normal for this time of the year.

### **Insect Scouting, Outlook and Management** Last Modified: 06/05/13

#### **Thrips**

Survey of the four sentinel (observation) plots: Average number of thrips (larvae + adults) per plant varied between 2 and 7.

#### **Maggots**

No surveys or reports at this time

#### **Other**

No surveys or reports at this time

### **Disease Scouting, Outlook and Management** Last Modified: 06/05/13
